Product sheet

5-Pole Quick Connector 0.5-2.5 mm

Brand: ALFA

Reference: ALFA 27726

The 5-pole quick connector allows for a safe and efficient electrical connection in low-voltage installations. It is compatible with cable sections ranging from 0.5 mm² to 2.5 mm², ensuring a precise fit without the need for special tools for mounting on panels or electrical boards.

Description

The 5-Pole Quick Connector is an electrical interconnection device designed to ensure safe and efficient unions in low-voltage installations. Its technology allows for agile assembly without the need for complex tools, facilitating energy distribution in various industrial and residential environments.

Technical Specifications

- Compatible cable: 0.5 mm² to 2.5 mm²
- Number of poles: 5
- Connection type: Quick

This device offers superior reliability by ensuring stable contacts that minimize energy losses and prevent failures due to poor connections. Its robust design makes it an essential component for maintaining the operational continuity of electrical systems.

Installation is simple: insert the cable into each terminal until the locking position is reached, visually verifying correct insertion before energizing the circuit. Handling requires only adequate manual force to ensure retention of the conductor within the available poles.

Specifications

Colour	Gris/Naranja

EAN	8425160277260
Material	ABS
Weight (kg)	0.0072
