S-EMBEDDABLE GRAPHITE HORIZONTAL FRAME WITH 2 ONLEX ELEMENTS

Brand: ALFA

Reference: ALFA 28118

The Onlex recessable horizontal graphite frame integrates two structural elements made of resistant ABS finish. Its technical design facilitates fast and accurate installation in industrial lighting systems, ensuring mechanical stability and operational durability under standard conditions of use without requiring additional complex adjustments during the final assembly of the equipment.

Description

The S-EMPOTRAR recessable frame of the Onlex series is a robust fastening system designed to integrate electronic components into metal panels or structures. Made of high-precision technology, it ensures a secure and stable hold for two elements simultaneously, optimizing the space available in industrial and control applications by means of a high-strength ABS finish.

Technical characteristics

- Material: High resistance ABS finish
- Configuration: 2 items
- Orientation: Horizontal model
- Type: Embedded system

This component offers an efficient solution for equipment organization, providing a solid base that protects devices against vibrations and accidental movements during their continuous operation in demanding environments. Its technical design facilitates fast and accurate installation in industrial lighting systems, ensuring mechanical stability and operational durability under standard conditions of use without requiring additional complex adjustments during the final assembly of the equipment.

The installation is direct and simple, requiring only the alignment of the frame with the predefined mounting slots on the base panel. Once positioned, it is firmly secured through internal restraint mechanisms without the need for additional complex tools, facilitating fast and safe maintenance for daily operational management.

Specifications

Colour	Grafito
EAN	8425160281182
Material	ABS
# Elements	2 elementos
Weight (kg)	0.0364
