Description

The Onlex square base is a compact electrical solution designed to ensure safety and functionality in standard domestic or commercial installations. It integrates three power sockets with ground connection and a light switch that allows independent control of the electrical supply without the need to operate external devices.

Technical characteristics

- Three sockets with direct contact protection
- 1.5 meter power cable in high strength insulated PVC
- Integrated light switch on and off
- White color for aesthetic integration in various environments
- Child protection system incorporated into sockets

This device ensures a safe electrical distribution thanks to its ground connections and robust construction, protecting both the connected equipment and users from common electrical hazards. The presence of child protection prevents domestic accidents during normal residential use.

The installation is simple by connecting the 1.5 metre cable to the electric panel or to a suitable magnetic switch according to the current regulations. Its operation requires only pressing the light switch to activate or disable the sockets, facilitating use in passing areas or rooms where energy control is needed without resorting to separate switches located in other areas.

Specifications

Colour	White
EAN	8425160284978
Long	1,5 m
Material	ABS
Weight (kg)	0.347
Power (W)	3680
Nominal voltage (V)	16
