IP68 Exterior Junction Box with 4 Cable Glands

Brand: ALFA

Reference: ALFA 28727

The IP68 outdoor junction box made of high-strength ABS ensures durability against impacts and external agents. It features four cable glands for secure sealing of cables between 0.5 mm² and 2.5 mm².

Description

The IP68 Outdoor Junction Box with 4 cable glands is a connection device designed for environments exposed to adverse conditions, ensuring the integrity of electrical circuits through total protection against dust and water.

Technical Features

- Body made of high-strength ABS.
- IP68 protection level, dust-tight and submersible up to 4 meters.
- Equipped with 4 cable glands for secure cable sealing.
- Compatibility with cables ranging from 0.5 mm² to 2.5 mm².
- High durability against impacts and external agents.

Its robust construction allows installation in wet areas, outdoors, or submerged, ensuring the operational continuity of critical electrical installations without risk of failure due to moisture or corrosion. Total protection against external agents ensures reliable operation even in marine or industrial environments exposed to the elements.

Installation is simple: open the lid, insert cables through the cable glands, and close the body hermetically, achieving immediate sealing that meets the required standards for underwater or high environmental exposure applications. This procedure ensures a quick and secure connection without the need for additional specialized tools.

Specifications

Colour	Black
EAN	8425160287276
Material	ABS
Weight (kg)	0.156
Protection	IP68
