

Product sheet

F.O. Keystone Patch Kit + SC/APC Adapter + 20m Cable

Brand: TELEVES

Reference: TELEVES 233243

Complete fiber optic plug-in kit that integrates keystone module, SC/APC adapter and 20 meter single-mode hose. The system allows for the installation of female connectors on standard RJ45 covers by means of toolless pressure insertion.

Description

The KIT FO KEYSTONE + SC/APC + LATIGUILLO 20M ADAPTADOR is a comprehensive solution for the completion of single-mode fiber optic networks in structured environments. This set allows the optical access point (PAU) to be connected to the end-point of the user, ensuring a stable and high quality signal transmission using SC/APC technology. Its design is optimized for facilities in conventional pipelines, facilitating deployment to offices, residential buildings and data centres where timely and robust connections are required.

Technical characteristics

- Monomode fiber optic hose pre-connected with SC/APC connectors at both ends.
- Cable length: 20 meters, enough to cover average distances in installations.
- Standardized Keystone module compatible with all conventional RJ45 socket covers.
- SC/APC female adapter for direct integration into the Keystone module.
- Shorter boot at one end of the hose to reduce attenuation by curvatures.
- Robust material designed to facilitate sliding through narrow channels.
- Less demanding curvature angle, allowing compact and safe installations.

The main advantages lie in its ability to minimize signal losses during installation. The short boot of the hose prevents attenuation increases by bending the cable near the socket, ensuring an optimal reception of the signal from the PAU. In addition, the compact design of the Keystone module and adapter reduces the space needed in the cover, optimizing the management of wiring and improving the aesthetics of the final installation.

Specifications

EAN	8499216573644
Length	20 metros
