

Product sheet

Duplex fiber optic pigtail SC/APC 30m

Brand: TELEVES

Reference: TELEVES 232635

Single-mode (SM) fibre optic duplex hose pre-connected with SC/AP connectors, designed for internal networks under the Euroclass Dca-s2,d2,a1. It has orange LSFH cover and short boot ends that facilitate installations in wall sockets reducing the radius of minimum curvature and optimizing the space available in the connection areas of the network.

Description

The 30 metre SC/APC single-mode fibre optic duplex hose is a pre-connected solution designed for high-reliability interconnections in inner point-to-point networks. Its low-loss technology and outdated connectors ensure efficient space management and minimizes attenuation in environments where optimal data transmission is required.

Technical characteristics

- Length: 30 meters
- Type of fibre: Monomodo (SM), ITU-T standard G.657.A2
- Cover: LSFH, orange
- Connectors: SC/APC at both ends
- Euroclass: Dca-s2,d2,a1 for indoor use
- Extremos: Short boot providing reduced curvatures
- Identification: Includes identifiers for each fibre

Thanks to its LSFH cover and out-of-date connectors, this cable minimizes attenuation by unwanted curvatures and allows smooth sliding through narrow channels. The short boot at both ends reduces the necessary curvature radius, making better use of the space in the connecting areas and avoiding signal loss.

The installation is easy by attaching directly to wall sockets or sliding through ducts, benefiting from its low angular requirement. Its high reliability and low levels of attenuation ensure optimal data transmission in access networks and internal distribution.

Specifications

Colour	Orange
EAN	8499215400811
Long	30 m
