

Product sheet

Compact cable stripper for coaxial and data up to 7.5 mm

Brand: TELEVES

Reference: TELEVES 2162

This professional pelacable cuts the cover and dielectric of coaxial and data cables in two precise steps. It has two separate blades optimized for a clean cut without damaging the internal components. It is suitable for all types of cables with diameters up to 7.5 mm and PVC or PE covers, offering a round edge that guarantees safety during use in electrical and telecommunications installations where efficiency is required in the preparation of cables for secure and durable connections in modern infrastructure projects.

Description

Pelacables is a precision tool designed for efficient cutting and peeling of coaxial and data cables. Its dual technology makes it possible to separate the exterior cover from the interior dielectric in two quick movements, optimizing work in telecommunications, radio hobby and audiovisual installations where driver integrity is critical.

Technical characteristics

- Diameter range: 4.7 to 7 mm
- Separate knives: one for deck and one for dielectric
- Round edge in blades for greater safety
- Materials: blade steel, ergonomic compact body
- Compatibility: PVC and PE covers up to 7.5 mm
- Supply: single bag for safe transport

Thanks to its round edge and the separation of its two blades, this device prevents damage to the metal core during operation. The fixed slot ensures a clean cut without manual adjustments, facilitating repetitive work on structured wiring projects or antenna maintenance.

The installation simply requires removing the protective bag and attaching the tool to a work bench or carrying it on the technician's belt. Its compact design allows it to be handled with a single hand, while its wear resistance ensures constant performance over time without the need for specialized maintenance.

Specifications

Diameter	4.7
EAN	8424450021620
Material	Steel
