Threaded U-Bracket Mast Support 300mm Zincated RPR

Brand: TELEVES

Reference: TELEVES 240410

Straight mast holder with 300mm U profile for wall-stuck installation. Made of steel with dual zinc treatment and reactive sealing (RPR) which guarantees high corrosion resistance. They are installed in pairs to secure the mast in two points, offering a robust and durable fixation for metal structures.

Description

The 300mm screwable U RPR mast holder is a structural element designed to fix masts on vertical surfaces such as walls or facades. Made of high-strength steel technology, it guarantees the necessary stability in environments exposed to adverse weather conditions. Its profile in the form of "U" allows a precise and safe installation, ensuring that the mast remains firm in its position.

Technical characteristics

- Dimensions: 300mm separation between anchor points.
- Materials: Steel with dual galvanizing treatment and reactive sealing (RPR).
- Profile: Form in "U" straight optimized for wall mounting.
- Resistance: Large anti-corrosion capacity thanks to zinking and RPR coating.
- Installation: Screw-down system that requires pair mounting for double clamping point.

This support offers significant advantages in terms of durability and structural safety. The combination of galvanizing and reactive sealing provides a superior barrier against oxidation, extending the life of the system even in coastal areas or with high humidity. Its robust design ensures that the mast supports high loads without deformations, maintaining the integrity of the installation in the long term.

The installation is simple but requires attention to detail to ensure stability. Two supports should be fixed in pairs, ensuring an exact separation of 300mm between them. It is essential to use the recommended screws for the wall material and verify that the anchor points are leveled before

proceeding with the installation of the mast, thus ensuring a professional and durable assembly.

Specifications

Diameter	300mm
EAN	8424450190272
Long	300mm
Material	Steel
