Description

The Classic Series Distribution Box is an essential component designed for the interior of domestic enclosures, allowing to organize and protect up to 18 electrical elements. Made of resistant thermoplastic material, this solution integrates box, lid, frame and door into a compact and functional set. Its surface assembly technology facilitates installation on plaster, adapting perfectly to the needs of modern residential electrical distribution.

Technical characteristics

- Power: Up to 18 items
- Housing material: Thermoplastic plastics
- Dimensions: 348x192x68 mm (Width x Height x Depth)
- Degree of protection: IP40
- Rail DIN: Yes
- Assembly: Superficial on cast
- Number of rows: 1
- Width in modules: 18
- Cover type: Tapa
- Colour: White

This device offers significant advantages by ensuring an orderly and safe distribution of electrical components within the home. The capacity to accommodate up to 18 elements ensures sufficient space for the necessary wiring, while the IP40 degree of protection effectively protects against accidental dust

and splashing, prolonging the service life of the installation.

The installation is simple thanks to the method of superficial assembly on plaster, which allows fast and stable fixation without the need for deep drilling. By connecting the elements in the available DIN rail, efficient cabling management is achieved, facilitating both future maintenance and expansion of the home power grid with total safety.

Specifications

High	34.8
Width	19.2
Colour	White
EAN	8423220011687
Material	Plástico
Measures	34.8 x 19.2 x 6.8
# Elements	8 elementos
Depth	6.8
Protection	IP40
