Blanking cover for box 5520 with screw

Brand: SOLERA

Reference: SOLERA 5520TA

Rectangular blind cover for splice or shunt box ref. 5520, with screw fastening system and specific cover. Made of halogen-free white thermoplastic material, guaranteeing safety and durability in electrical installations under current technical regulations.

Description

The screw cap for box 5520 is an essential protection component designed to hermetically close splice or electric shunt boxes. Made of high-strength thermoplastic material technology, it guarantees the safety of the equipment against external agents such as dust, moisture and mechanical impacts. Its application extends to industrial, commercial and infrastructure environments where it is critical to maintain the integrity of electrical circuits and comply with existing safety regulations.

Technical characteristics

- Material: Thermoplastic halogen-free plastic.
- Geometric shape: Rectangular.
- Colour: White.
- Type of fixation: Screw cover.
- Model: Blind cover.
- Mechanical connection: Includes screws to ensure closure.
- Compatibility: Ref. 5520.

This accessory offers significant advantages by providing a robust physical barrier that protects internal drivers without compromising the aesthetics of final assembly. Being halogen-free, its use contributes to reducing fire risks and facilitates compliance with strict environmental standards in modern projects. The smooth surface and rectangular design allow perfect integration into any standard splice box.

The installation is easy and fast thanks to the screw system that ensures an immediate and secure

fixation. For handling, it is recommended to apply screws with the right force until a tight closure without deforming the thermoplastic material. Maintenance is minimal, consisting solely of periodically inspecting the state of the screws and cleaning the white surface to maintain its original appearance.

Specifications

Colour	White
EAN	8423220054882
Material	Plástico
