Description

The screw cap for box 5530 is an essential protection and closing component designed specifically for electrical splice or shunt boxes. Made with advanced materials technology, it guarantees the integrity of the system against external agents such as dust, moisture and UV radiation. Its main application resides in industrial, commercial and public infrastructure environments where an airtight and durable seal is required for cable connection points.

Technical characteristics

- Material: Thermoplastic halogen-free plastic
- Colour: White
- Geometric shape: Rectangular
- Type of fixation: Cover for screws
- Model: Blind cover
- Presence of screws: Yes

This accessory offers superior protection thanks to its halogen-free composition, which facilitates waste management and reduces toxicological risks in case of fire. The white surface and rectangular design optimize visual aesthetics in exposed installations, while fastening by screws ensures fast mounting and robust mechanical closure that prevents unauthorized access to internal components.

The installation is done by means of direct screwing on the corresponding box, ensuring a uniform pressure to keep the seal. Maintenance is minimal, consisting only of periodic visual inspection of the

state of the screws and the integrity of the plastic housing to ensure that it continues to fulfil its function of protection in the long term.

Specifications

Colour	White
EAN	8423220054899
Material	Plástico
