Description

The Compact Stacktech Tool Box is a modular container designed to safely organize and transport equipment. Its structure allows stacking units and maintaining order in reduced spaces.

Technical characteristics

- Type: Toolbox
- Protection class: IP65
- Main material: High resistance polymer
- Reinforcement: Steel Corners for Fixing Accessories
- Closing: Unmounted and secured latch
- Maximum capacity: 34 kg
- Measurements: 40 x 26 x 34 cm
- Internal configuration: Includes tray and five dividers that create six compartments
- Design: Modular and stackable

The internal configuration with multiple compartments facilitates the separation of tools or components, optimizing the space available within the container.
