## Description

The FITTING dial valve is an essential component for the plumbing and air conditioning system, designed to regulate or cut the flow of fluids in pipes of nominal diameter 40 mm by means of its rotating ball mechanism that ensures efficient watertightness.

Technical characteristics

- Mark: FITTING
- Type: Ball valve
- Connection system: Collapse
- Size: 40

This accessory is integrated into installations where precise control of the passage of water or other liquids is required, offering a robust solution for the management of flows in industrial and residential hydraulic networks.
