Description

The self-compensating drip bag RIEGO is an irrigation system designed for agriculture, gardening and fish farming, facilitating the supply of water to crops or plants through an automatic drip mechanism.

Technical characteristics

- Mark: RISKS
- Number of units: 15
- Nominal flow rate: 4 L/h
- Reference code: 19080

Given its flow rate of 4 litres per hour and the configuration of 15 units, this set allows a controlled distribution of water in cultivation or garden areas that require a moderate and constant water supply without the need for external manual regulation.
