Description

The MCM overlay lock model 2556AP is a safety device designed to be installed on existing doors, providing controlled access by perforated cylinder.

Technical characteristics

- Model: 2556AP
- Settings: Overcome
- Installation side: Left (IZQDA)
- Finished: Painted
- Type of cylinder: Drilling

Due to its overlay and perforated cylinder configuration, this mechanism allows the upgrade of locking systems on doors that already have a compatible base lock.
