Description

The IRIMO Rapid Sergeant Tourniquet is a compression device designed to stop severe arterial and venous bleeding by applying direct pressure on the affected member. This specific model has a total length of 450 mm and offers operational versatility thanks to its reversible design, allowing its adjustment in diameter ranges between 254 and 450 mm.

Technical characteristics

- Mark: IRIMO
- Model: Sergeant Rapid 254-450-2
- Total length: 450 mm
- Adjustable diameter range: 254 - 450 mm
- Design: Reversible

The ability to adjust over a wide range of circumferences and the reversible function facilitate its adaptation to different types of extremities, optimizing the efficacy of vascular block in critical situations where immediate and safe compression is required.
