Description

The IRIMO Rapid Sergeant Tourniquet is a compression device designed to stop arterial and venous bleeding by applying direct pressure to the affected member. This specific model has a total length of 600mm and is made of two different colors, allowing its reversible use according to operational need.

Technical characteristics

- Length: 600mm
- Mark: IRIMO
- Type: Sergeant Quick.
- Settings: Reversible (double color)
- Model: 254-600-2

The ability to be reversible offers versatility in the field, allowing the orientation of the tourniquet to be adapted to the environment or to the user's preference without the need to change equipment. Its functional design prioritizes the speed of application and effectiveness in critical situations where time is a determining factor.
