### Description

This EasyLED LED Initial Connection Kit is designed to facilitate the safe termination of wiring at the ends of the light strip, ensuring proper initial preparation using its specific components.

#### Technical characteristics

- Includes 2 staples
- Includes 1 cap
- Internal code: U17ZKA

The set allows to fasten and close the ends of the LED strip using the provided staples, while the plug closes the final connection. This system ensures that wiring is ready and ready for integration into the lighting project without the need to add external elements not specified by the manufacturer.
