Product sheet

Solar wall light with light sensor 9AK9A

Brand: LEDME

Reference: LEDME LM8273

The Solar Application with Light Sensor (SKU 9AK9A) is an autonomous outdoor lighting device that integrates ambient light sensor to activate nighttime ignition automatically. This system ensures efficient operation without connection to electrical grid, optimizing energy consumption by precise detection of darkness in residential or industrial environments.

Description

The Solar Sensor Light Application is an outdoor lighting device designed to run on solar energy and be activated by sensors. Its main purpose is to provide automatic light in outdoor spaces when darkness is detected.

Technical characteristics

- _sku_internal: 9AK9A

Since the product incorporates sensor technology and solar power, its use is oriented to autonomous lighting in areas where motion activation or light changes are required without the need for electrical wiring.

Specifications

EAN	8435579782736
Manufacturer	NO DEFINIDO
Usage	Outdoor
