12-24V LEDME Signal Amplifier

Brand: LEDME

Reference: LEDME LM2268

Signal amplifier designed for 12 to 24V systems, manufactured by LEDME. Operates with a DC power supply of 5 to 24V. Its physical dimensions are 60x80x20 mm, allowing a compact installation.

Description

The LEDME 12-24V Signal Amplifier is a device designed to optimize signal transmission in low voltage electrical systems. This component is integrated into circuits where it is necessary to strengthen the signal intensity to ensure stable and efficient communication between the various elements of the system.

Technical characteristics

- Mark: LEDME
- Power supply: DC 5-24V
- Dimensions: 60 x 80 x 20 H mm
- Guarantee: 3 years

Its compact design facilitates installation in reduced spaces, while its versatile power range allows its use in various continuous power configurations. The three-year warranty supports the quality and performance of the equipment during its standard use period.

Specifications

Manufacturer	Ledme
Nominal voltage (V)	5-24 V
Current type	DC
