Description

The Livinglight plate of 1 module in Antracita color, next to its support, is designed to cover the electrical mechanism and customize the aesthetics of the installation. This accessory is mounted specifically in profillery, offering a clean and functional finishing solution.

Technical characteristics

- Material: Thermoplastic halogen-free plastic.
- Colour: Anthracite (similar to RAL 7015) with bright surface.
- Dimensions: 36 mm wide, 80 mm high and 9.3 mm deep.
- Open installation and compatible with integrated assembly.
- Vertical mounting position with locking position.
- Degree of IP protection: Other; Impact force: IK00.

Being a component of 1 module, it allows a discreet integration into modular systems. The glossy surface and the non-treatment finish add a uniform appearance to the set.
