Description

Tap handle equipped with adaptable floron, designed to facilitate water flow control in sanitary facilities. This accessory is distinguished by its coupling mechanism, which allows compatibility with different types of valve shafts, ensuring a versatile and functional installation in multiple existing tap configurations.

Technical characteristics

- Includes adaptable floron for greater mounting versatility.
- Coupling mechanism compatible with different types of valve shafts.

The presence of the adaptable floron simplifies the attachment process to the tap shaft, reducing the need for specific additional parts. This feature contributes to a more fluid and precise operation of the water opening and closing mechanism, offering a practical solution for updating or repairing existing taps.

Specifications

EAN	8428381296300
