Description

The K8 bathroom monocommand allows unified control of the water flow rate and temperature through a single controller. This device is designed to provide stable operation in humid environments, meeting the technical standards of residential and commercial plumbing.

Technical characteristics

- Model: K8
- Type: Bathing monomand
- Includes complete installation kit for surface mounting

The daily temperature and flow regulation is simplified thanks to its unique control design. The inclusion of the installation kit indicates that the product is ready for surface mounting, facilitating commissioning without the need for any additional unspecified components.
