Niron eccentric union socket 63 x 2

Brand: Italsan

Reference: ITAL NBD632FP

Niron crazy thermofusion rack for 63 mm pipe with 2-inch threaded connection. It allows the monolithic bonding between the polyethylene and the threaded component by fusion welding, ensuring the structural integrity of the hydraulic system.

Description

The Racor loco union socket 63 x 2 Niron is a thermofusion accessory designed to connect polyethylene pipes with threading systems. Its main function is to facilitate the safe connection between the pipe line and the threaded connections, ensuring the integrity of the hydraulic system by means of a fusion welding that creates a monolithic bond.

Technical characteristics

- Pipe diameter: 63 mm.
- Screwed connection: 2 inches.
- Type of binding: Socket.
- Mark: Niron.
- Installation method: Thermofusion welding.

This accessory allows the pipe and the tailing to form a unique body after the welding process. This technical feature results in total safety at the junction, minimizing the risk of leakage and ensuring the durability of the connection in fluid installations.

Specifications

Diameter	63 mm
EAN	8499213409779
Manufacturer	Italsan

Long	2 pulgadas
Material	Polietileno
Measures	63 mm
Depth	2 pulgadas
