

Product sheet

Polyurethane float 9 cm 3/8 thread

Brand: SOBI

Reference: SOBI 048161

Floating Boya made of porexpan with 9 cm diameter and 3/8 inch thread. Designed for technical applications of fastening or controlled flotation, it offers a lightweight and moisture-resistant structure.

Description

flotation boya made of porexpan, designed to provide light support in assembly or controlled flotation systems. Its structure is optimized to provide dimensional stability and facilitate integration into technical environments requiring low density components.

Technical characteristics

- Material: Porexpan
- Diameter: 9 cm
- Thread: 3/8 inches

The combination of its diameter and porexpan material allows easy integration into systems that need controlled flotation. Its standard thread design facilitates connection with other compatible components, ensuring a safe and functional fixation without the need for complex tools.

Specifications

Diameter	9 cm
EAN	8499212291740
Manufacturer	SOBI
