Description

Male entronque designed for the connection of copper pipes, allowing the derivation of fluids in sanitary or gas installations. This accessory facilitates the connection between different sections of pipe or the connection with male components, ensuring a tight and safe connection.

Technical characteristics

- Connection type: Male entronque.
- Compatible material: Copper tube.
- Measurements: 15x1/2".
- Category: Accessories for copper pipe.

The 15x1/2" measurement specification allows quick identification of compatibility with the rest of the installation, avoiding mounting errors and ensuring an adequate flow through the connection. Its standard design ensures optimal compatibility with copper tubes of 15 mm diameter, ensuring the integrity of the hydraulic system.

Specifications

Diameter	15 mm
EAN	8431977202043
Manufacturer	SOBI
Material	Copper
