Description

Male connector designed for the connection of copper pipes with an external diameter of 18 mm and a 3/4 inch thread. This accessory allows the shunting of fluids in sanitary or gas installations, ensuring a tight and safe bond by welding or brasure.

Technical characteristics

- Tube diameter: 18 mm
- Thread: 3/4"
- Compatible material: Copper
- Connection type: Male

The standard 18x3/4" measure ensures direct compatibility with the most widely used copper tubes on the market. Being a connecting component, its main function is to allow the derivation or connection of other elements to the main pipe without the need to cut the existing duct, optimizing the structure of the installation.

Specifications

Diameter	18 mm
EAN	8431977202104
Manufacturer	SOBI
Material	Copper
