

Product sheet

Male copper coupling 28x1

Brand: SOBI

Reference: SOBI G-243284

Male connector for copper pipes of 28 mm of outer diameter with 1 inch thread. Designed to conduct bypasses in sanitary or gas installations, ensuring an airtight and pressure-resistant bond of the circulating fluid.

Description

Male connector designed for the connection of copper pipes, allowing for derivation or directional changes in hydraulic installations. This accessory ensures a safe and efficient connection between the components of the pipe system, facilitating the management of fluid flow in cold or hot water circuits.

Technical characteristics

- Tube diameter: 28 mm
- Screw diameter: 1"
- Compatible material: Copper
- Connection type: Male

This component is essential for the correct running of circuits, ensuring the structural integrity of the installation. Its standard design ensures compatibility with other parts of the same copper accessories family, optimizing system functionality.

Specifications

Diameter	28 mm
EAN	8431977202180
Manufacturer	SOBI
Material	Copper
Thread	1"
