Description

750 ml polyurethane foam designed for use by pistol, oriented to filling and sealing holes in construction structures. It allows a uniform finish in frames, windows and tubes thanks to its controlled expansion.

Technical characteristics

- Pack capacity: 750 ml.
- Application method: gun compatible.
- Adhesion on concrete, brick, stone and PVC.

Adherence in these materials facilitates the sealing of irregular spaces. The 750 ml format allows to cover moderate surfaces with precision, optimizing the use of the product in filling and sealing tasks.

Specifications

EAN	8413532900052
Manufacturer	Collak
Capacity (ml)	750 ml
