Description

The Kit Cisterna A-53 is a set of components designed to manage filling and flushing into toilets. Its main function is to allow the rapid replacement of the internal mechanism without the need to replace the complete tank, facilitating the updating of the water system.

Technical characteristics

- Includes specific accessories for filling and unloading.
- It has a adjustable double-discharge push-button.
- It allows to select between a consumption of 3 liters or total discharge.
- Adjustable system to adjust the volume of water released.
- Compatible with the ROCA base and most toilets on the market.

This kit offers the flexibility to choose between a saving partial discharge or a higher total power. The complete regulation allows to adapt the consumption to the preferences of the user, optimizing the daily performance. Its universal design ensures direct integration with most existing models, including the foundation of the ROCA brand, ensuring a simple and efficient installation.
