Disassemblable PVC Ball Valve 32mm for PE Pipe

Brand: Jimten

Reference: JIMT 052537

Detachable sphere valve made of PVC with a nominal diameter of 32 mm, designed for direct connection with polyethylene pipes. Its structure allows the maintenance of internal components without dismantling the complete installation, optimizing flow management in agricultural and industrial systems through a stable and secure connection.

Description

Detachable sphere valve made of PVC, designed specifically for direct connection with polyethylene pipes. This component allows the control of the flow in installations in various sectors, highlighting its application in the agrofood and industrial field. Its removable structure facilitates the management and maintenance of the driving line, offering a reliable solution for each specific application.

Technical characteristics

- Material: PVC
- Type: Detachable sphere valve
- Nominal diameter: 32 mm
- Compatibility: Link for polyethylene tube

The PVC construction ensures adequate chemical resistance and durability over time, while the removable design optimizes technical review tasks. Being prepared to connect directly with polyethylene, it simplifies integration into existing pipe systems without the need for additional adapters, ensuring a stable and secure connection.

Specifications

Diameter	32 mm
----------	-------

EAN	8426621525371
Manufacturer	Jimten
Range	Industrial
Material	PVC
