90° Elbow Coupling 32mm Range 55

Brand: Jimten

Reference: JIMT 055031

90 degree angled bond with a nominal diameter of 32 mm, belonging to the 55th Range. Designed to facilitate the change of direction in pipes, this fitting ensures a secure and efficient connection in fluid systems.

Description

The angled link 90° 32 mm Range 55 is a connection component designed to facilitate directional change in pipes. Its main function is to allow the derivation of flows at an angle of 90 degrees, integrating into systems that require precision in the orientation of the route.

Technical characteristics

- Clamp angle: 90 degrees.
- Nominal diameter: 32 mm.
- Range Reference: Gama 55.
- Mark: Jimtem.

This accessory optimizes flow management in environments where pipeline orientation is a key factor for system performance, ensuring a secure and efficient connection.
