Description

Reduction threaded male 2" to female 1" made of polypropylene. This compression accessory is designed to connect high and low density polyethylene (PE) pipes, allowing for diameter changes in the installation. Its compact construction facilitates integration into existing pipe systems.

Technical characteristics

- Material: Polypropylene
- Type: threaded reduction male 2" female 1"
- Compatibility: PE pipes (high and low density)
- Function: Compression accessory

The piece offers a simple and reliable installation, having been tested by different European Certification Organisations. This ensures its performance in standard polyethylene pipe applications.

Specifications

EAN	8426621515242
Manufacturer	Jimten
