Brand: Jimten

Reference: JIMT 007028

S-30 registration double curved syphon for sink with extendable necks and tail. Includes socket for electro-domestics and adjustable output. Available in two widths. Measures 1.1/2" x 40mm. Functional design for domestic plumbing facilities with standard connection and ease of assembly in reduced spaces.

[View product online](#)**Description**

The double curved siphon S-30 is designed for sinks, offering a functional solution thanks to its extendable necks. It incorporates a specific rack and socket to connect appliances, optimizing the space and functionality of the installation. Its adjustable output allows to adapt to different drainage configurations, while its recordable design facilitates the maintenance and cleaning of the drainage system.

Technical characteristics

- Double curvature model S-30.
- Extensible collars equipped with racor.
- Includes socket for electro-domestic connection.
- Adjustable output for greater mounting flexibility.
- Diameter 1.1/2" and height of 40 mm.
- Available in two different widths.

This configuration allows to manage the drainage of two sources simultaneously, including the connection of dishwasher or other equipment, maintaining an appropriate order in the kitchen area. The possibility of adjusting the extension of the necks and the orientation of the output contributes to a more precise installation and adaptable to the needs of the user.
