Description

This registrable vertical siphon is specifically designed for smooth tubes of the S-38 series. Its structure incorporates a fixed neck that facilitates the connection and maintenance of the drainage system, guaranteeing an orderly and functional installation in spaces where subsequent access is necessary.

Technical characteristics

- Model: S-38 vertical siphon
- Compatibility: Flat tubes
- Nominal diameter: 1 1/4 inches
- Type of neck: Fixed
- Accessibility: Recordable

The combination of a fixed neck and registration capacity allows easy verification of the inside of the siphon without the need to disassemble the entire installation. This design optimizes the flow of water and facilitates regular cleaning, maintaining the efficiency of the wastewater disposal system.
