Description

The S-67 registrable curved siphon is specifically designed for installation in sinks, offering a functional solution for sewage disposal. Its curved structure allows an efficient connection to the drain, while the extendable neck facilitates adaptation to different installation heights, ensuring a precise adjustment in the available space.

Technical characteristics

- Model S-67 curved and registrable type.
- Includes extendable collar with tail for a secure connection.
- It has an adjustable output that allows to adjust the flow direction.
- Connection measures 1.1/2" x 40mm.

The combination of the adjustable output and extendable neck provides flexibility during installation, allowing the user to adapt the siphon to the specific conditions of the furniture or wall. This design contributes to a more orderly management of hydraulic connections in the washing area.
