Description

A sphere valve made of PVC, designed with a removable system for easy maintenance. It incorporates a polyester tube link, allowing a flexible and adaptable connection to different pipe configurations. This component is designed for flow control in installations where reliability and ease of handling are required.

Technical characteristics

- Valve material: PVC
- Valve type: Area
- Design: Removable
- Nominal diameter: 25
- Link material: Polyester tube

The removable structure allows access to internal components without the need to unmount the entire line, optimizing the revision tasks. The use of polyester in the link provides flexibility to the connection, reducing mechanical stresses at binding points. These characteristics make it suitable for applications in agro-food and industrial sectors where precise fluid control is a priority.

Specifications

Diameter	25 mm
----------	-------

EAN	8426621522820
Manufacturer	Jimten
Range	Industrial
Material	PVC
Measures	25 mm
