Description

Ball valve made of PVC with removable design and a nominal diameter of 63 mm. This component is designed for flow control in pipe systems, offering a functional solution for agro-food or industrial installations. Its structure allows effective fluid flow management in various technical environments.

Technical characteristics

- Material: PVC
- Type: Detachable sphere valve
- Nominal diameter: 63 mm
- Link: Polyester tube

The removable nature of the valve facilitates its maintenance and possible repair, which contributes to the operational continuity of the installation. The use of PVC and polyester bonding define its compatibility with the driving systems where it is integrated, ensuring an appropriate connection according to the manufacturer's specifications.

Specifications

Diameter	63 mm
----------	-------

EAN	8426621522868
Manufacturer	Jimten
Range	Industrial
Material	PVC
Measures	63 mm
