Description

A sphere valve made of PVC, specifically designed for gluing connections. This component allows effective flow control in various facilities, highlighting its versatility in sectors such as agrifood and industrial. Its removable structure facilitates maintenance and inspection, ensuring a reliable solution for each specific application.

Technical characteristics

- Material: PVC
- Connection type: Collapse
- Nominal diameter: 32
- Design: Removable

The removable nature of this valve simplifies the review and cleaning tasks, optimizing the management of the facilities. Being made of PVC, it offers a suitable solution for fluid handling in contexts where material compatibility is a relevant factor in equipment selection.

Specifications

EAN	8426621522035
Manufacturer	Jimten
Material	PVC
