Disassemblable PVC ball valve 40mm for solvent welding

Brand: Jimten

Reference: JIMT 052204

Ball valve made of PVC with nominal diameter of 40 mm. Its removable design allows maintenance without dismantling the pipe. The connection by gluing ensures watertightness in agro-food and industrial installations, facilitating flow control in fluid systems.

Description

Spherical valve made of PVC, removable model of 40 mm, designed specifically for assembly by gluing. This component allows flow control in various facilities, offering a versatile solution for applications in the agro-food and industrial fields.

Technical characteristics

- Material: PVC
- Type: Detachable sphere valve
- Nominal diameter: 40 mm
- Method of binding: Collapse

The removable structure facilitates the maintenance and internal cleaning of the equipment, ensuring precise control of the flow of fluids. Its design is aimed at integrating into systems where ease of assembly and compatibility with adhesive connections are key requirements for operational efficiency.

Specifications

EAN	8426621522042
Manufacturer	Jimten
Range	Industrial
Material	PVC
