Description

Ball valve made of PVC with removable design and 1/2" connection with female thread. This component is designed to facilitate flow control in different types of facilities, offering a practical solution for applications in both the agri-food and industrial sectors.

Technical characteristics

- Material: PVC
- Connection type: Female Thread
- Nominal diameter: 1/2"
- Structure: Removable

The removable construction allows for more agile maintenance, while the PVC material guarantees compatibility with various fluids in technical environments. Its compact format and standardized female thread facilitate integration into existing pipe systems without the need for complex adaptations.

Specifications

EAN	8426621522349
Manufacturer	Jimten
Range	Industrial
Material	PVC
Measures	1/2"
