Description

The BARBI Multiplex 20x2.0 elbow is a component designed for connecting pipes in hot and cold water installations. Its main function is to allow directional changes in the circuit while maintaining the integrity of the flow.

Technical characteristics

- Nominal diameter: 20x2,0
- Mark: BARBI
- Implementation: Hot and cold water systems

This accessory is made of high strength materials, which ensures a secure and durable connection. Robust design contributes to optimal and constant flow within the installation.

Specifications

Diameter	20x2,0 mm
EAN	8432848052217
Manufacturer	Blansol
