Description

The BARBI brand's straight key shield controller is a component designed for the precise regulation of water flow in pipe systems. Its compact structure facilitates both operational handling and efficient storage in reduced workspaces, offering a functional solution for liquid management.

Technical characteristics

- Mark: BARBI
- Type: Control controller with hidden system straight keys
- Design: Compact, oriented to ease of handling and storage
- Main function: Precise water flow regulation
- Properties: High resistance materials and corrosion protection

This device optimizes the performance of the installations by allowing detailed flow control. The combination of its ergonomic design and corrosion resistance ensures a reliable and durable operation in installation and construction environments, where the accuracy and reliability of the equipment are priority aspects for the professional.

Specifications

EAN	8432848035715
Manufacturer	Blansol
