Description

The reduced Multipex 25-16-25 from the BARBI brand is a connecting part designed for pipe systems. Its main function is to allow the safe and efficient connection between ducts of different diameters, facilitating the adaptation of the hydraulic network in technical installations.

Technical characteristics

- Mark: BARBI
- Model: You reduced Multipex 25-16-25
- Compatibility: Multipex Pipes
- Function: Connection between pipes of different diameters

This piece offers a practical solution for the variation of calibres in the installation. Its specific design ensures a stable connection, contributing to optimal system performance. It is a reliable option for professionals looking for components adapted to their assembly needs.

Specifications

EAN	8432848054440
Manufacturer	Blansol
Material	Polietileno
