Galvanized reinforcement angle 1-60 mm 387 AMIG

Brand: AMIG

Reference: ALM 3006.0624

Steel reinforcement angle with square edge and zinc finish, model 387 AMIG, available in sections of 1 to 60 mm, designed for use in metal structures such as junction square or structural support.

Description

The box 100 zinc-plated angles 1-60mm 387 AMIG is a structural reinforcement element made of zinc-finished steel, designed to provide stability and rigidity in metal assemblies. Its square and square edge form allows a precise and secure bonding between profiles, ideal for industrial or lightweight construction applications where mechanical strength is required.

Technical characteristics

- Material: steel
- Finishing: zincated
- Form: squadron
- Profile: square edge
- Dimensions: 1-60 mm
- Reference: 387 AMIG
- Units: 100 units

This product allows a safe and resistant bonding between metal profiles thanks to its angle design and protective finish. Its use is indicated in structures that require precise fixation and basic durability in non-aggressive environments.

Specifications

Colour	Zincado
EAN	8413023003873
Manufacturer	AMIG
Material	Steel
