Description

The H2pro flat mop is a cleaning system that combines a flat mop with a double chamber bucket designed to maintain soil hygiene efficiently. This set allows to manage water separately, facilitating the task of cleaning in various domestic or professional environments.

Technical characteristics

- Model: H2pro flat mop
- Mop material: Microfiber
- Bucket system: Double chamber separating clean water from dirty water
- Mechanism: Drain integrated into the cube
- Implementation: Multisurfaces

The total separation between clean and dirty water helps prevent the redistribution of dirt during the process. The microfiber mop offers an adequate cleaning capacity to remove waste attached to compatible surfaces.
