**S&P Adjustable plastic booster
extractor outlet BOR-100**

Brand: S&P

Reference: SYP 5416615200

BOR-100 pump pump mouth made of adjustable white plastic. Designed to extract and drive air in commercial rooms and premises. It operates in a pressure range of 40 to 150 Pa. Incorporates mobile central shutter with adjustment screw to control the flow rate.

[View product online](#)**Description**

The BOR-100 booster pump mouth is a white plastic device designed for the extraction and impulsion of air in commercial rooms and premises. Its adjustable design allows precise control of the air flow according to the needs of the space.

Technical characteristics

- Material: White plastic.
- Function: Air extraction and drive.
- Range of use: Between 40 and 150 Pa.
- Control mechanism: Mobile central shutter with adjustment screw to regulate the flow rate.
- BORP version: Adjustable openings with anchor brackets for installation on the plate.
- BORJ version: Adjustable joint openings for duct installation.

This system offers a versatile solution for the management of ventilation, allowing to adapt the air flow through the adjustment screw. The availability of two mounting versions, one for pladur and one for duct, facilitates their integration into different installation configurations.

Specifications

Colour	White
