Description

The BORJ-80 impeller pump mouth is a white plastic device designed for the extraction and impulsion of air in commercial rooms and premises. Its functional design allows efficient management of air flow in ventilation facilities.

Technical characteristics

- Material: White plastic.
- Range of use: Between 40 and 150 Pa.
- Control mechanism: Mobile central shutter with adjustment screw to regulate the flow rate.
- Version: BORJ, adjustable joint openings for duct installation.

This model offers precise regulation of air flow thanks to its mobile central shutter. It is specifically configured for installation in ducts by means of joints, differentiating from versions with pladur supports. The plastic structure ensures a clean and functional integration into commercial ventilation systems.

Specifications

Colour	White
EAN	8413893520722
Manufacturer	S&P
Material	Plástico
