Airzone AcuaZone 32-zone control unit

Brand: Airzone

Reference: ZONE AZDI6ACUAZONE

Electronic central for the management of air conditioning systems with capacity for 32 zones. It controls thermostats, motorized gates and stop-March relays. It includes management of gateways and communications via integration bus for external equipment.

Description

The ACCUAZONE 32 ZONAS CENTRAL SYSTEM is an electronic equipment designed for the comprehensive management of air conditioning systems. Its main function is to control and monitor the state of thermostats, allowing the administration of up to 32 different areas using both wired and wireless devices. This component acts as the control core to optimize the operation of the installations.

Technical characteristics

- Management of up to 32 control areas.
- Compatibility with wired and wireless devices.
- Proportionality control and minimum air in motorized gates.
- Relay exits for the stoppage and operation of equipment and boilers.
- Management of control gateways to air conditioning equipment.
- Communication with external control systems via integration bus.
- Design for surface mounting.

This equipment facilitates the integration of different air conditioning subsystems, ensuring an accurate response in the control of flows and operating states. The ability to manage multiple zones and external devices allows centralized and efficient management of the thermal environment.

Specifications

EAN	8435418928943
Manufacturer	Airzone
