Description

KCRC100 Constant Flow Regulator, designed to maintain a stable flow in fluid systems. This component allows accurate control of the passage of liquids or gases, ensuring the operational stability of the equipment where it is installed.

Technical characteristics

- Model: KCRC100
- Function: Constant flow regulation
- Includes sealing gasket

This regulator facilitates flow management, contributing to system efficiency by avoiding unwanted variations in flow. Its design includes a board that helps maintain the integrity of the connection.
